### THE PSYCHOANALYTIC CORE:

#### ENCOUNTERING & SPEAKING TO THE UNCONSCIOUS

### The New York Centenary Conference

*“... Psycho-Analysis does not stay at abstractly affirming the two theses so painful to Narcissism — the psychical significance of sexuality and the unconsciousness of mental life — but rather proves them by means of a material that touches every individual personally and forces him to face these problems.”*

Centred on these foundational features which make up the essence of psychoanalysis and looking at our take on them in the early part of the 21st century, we will explore what it means to encounter the unconscious with three major conferences in New York, Buenos Aires and London.
